

1                   (j) ABSTRACT OF THE DISCLOSURE

2                   A three-component, protective headgear or helmet is  
3                   provided with a battery-powered LED head lamp, which may be used  
4                   by construction workers, search and rescue persons, cyclists,  
5                   police, fireman, and the like. The battery may be replaceable or  
6                   rechargeable and has long-term, uniform output characteristics  
7                   driven by unique circuitry.
